

Call for Speakers for Expert Lectures at the 2024 ISONG Congress

ISONG members are advancing genetics through research, education, practice, and policy innovations. Expert Lectures are being planned for the 2024 ISONG Congress to allow us all to benefit from recent advances in the field. The Congress Committee invites application submissions for Expert Lectures at this Congress on November 14-17, 2024, at Kona Kai Resort in San Diego, CA, USA. If you plan to submit an abstract in a content area in which you already have scholarly publications or presentations, please consider submitting your abstract as an Expert Lecture.

Priority for Expert Lectures will be given to those who address the Congress theme: “Generating Waves: Advancing Implementation Strategies from the Foundations of Genomic Nursing.”

Submissions should provide content on a focused topic related to nursing research, education, or practice. The number of presentations will be determined after submissions and reviews are completed. We expect presentations to last 30 minutes.

Applications are due by May 15, 2024, and should include the following information.

Presenter: For each presenter, provide the following information: name, credentials, affiliation/employer, city, state, country, email, and phone number.

Objectives: At the end of the lecture, attendees will be able to (list 4 learning objectives)

Publications: Provide citations for 2-3 publications relevant to the objectives of the presentation.

Content: Provide an outline of the content to be presented for each objective. If there are multiple presenters, please identify the presenter responsible for specific content.

Expert Lecturer: List 2-3 presentations or publications that you have presented and/or published relevant to the presentation **or** other evidence of your expertise.
